

The Mississippi-Rideau Source Protection Committee wants your input on their Draft Amendment for the Rideau Valley and Mississippi Valley Source Protection Area Assessment Report and Source Protection Plan (prepared under Ontario's *Clean Water Act*).

The Draft Amendment for the Assessment Report and Source Protection Plan identifies:

- The City of Ottawa is undergoing a project to establish a new intake for the Lemieux Island Water Purification Plant deeper and further into the Ottawa River and will retain the existing intake as a backup system.
- The draft amendment for the Source Protection Plan does not include any policy changes or changes to areas where policies apply but rather simple updates to reflect the addition of the new intake, including updated maps and schedules.
